

Cost Per Million BTU's (continued)

Electricity 3,413 Btu / kWh. Table with columns for cost per kWh (\$ 0.076 to \$ 0.140) and rows for efficiency levels from 82% to 400%.

Natural Gas 100,000 Btu / therm. Table with columns for cost per ccf (\$ 1.35 to \$ 2.50) and rows for efficiency levels from 55% to 95%.

Propane 91,500 Btu / gallon. Table with columns for cost per gallon (\$ 2.05 to \$ 3.20) and rows for efficiency levels from 55% to 95%.

Fuel Oil 138,700 Btu / gallon. Table with columns for cost per gallon (\$ 3.40 to \$ 5.25) and rows for efficiency levels from 55% to 95%.
