# WF-SL\*KIT Installation Steps

## **WARNING**

DISCONNECT ALL ELECTRICAL POWER BEFORE ELECTRICALLY CONNECTING OR SERVICING THE UNIT. FAILURE TO DISCONNECT THE ELECTRICAL POWER BEFORE WORKING ON THIS PRODUCT CAN CREATE A HAZARD LEADING TO PERSONAL INJURY OR DEATH.

## **Installation**

### **Step 1**

Disconnect all wiring from the existing control board.

### **Step 2**

Remove the existing door that the control board is fastened to by removing three screws located on the right hand side of the cabinet.

### **Step 3**

Install the new door and control board assembly.

### **Step 4**

Reconnect the factory wire harness, temperature sensors, field wiring, etc.

## **Electrical Installation Overview**

For detailed field wiring information and setup and operating procedures, please reference the attached installation manual. The installation manual included with this kit replaces the original manual sent with the plenum heater as it was shipped from the factory. Please discard the old installation manual and replace with this new one.
