ELECTRIC HEATING TECHNOLOGY

MANUFACTURED IN AMERICA
USING THE FINEST MATERIALS & COMPONENTS FROM AROUND THE WORLD

ELECTRO-BOILER® FLOOR STAND

The **Electro-Boiler Floor Stand** is a purpose-built mounting solution designed to provide a stable, professional installation for Electro-Boilers. Engineered for strength and versatility, the stand is available in **three size options** to accommodate multiple boiler classes, ensuring proper fit and optimal support across the Electro product line. Whether used in mechanical rooms, commercial installations, or retrofit applications, the floor stand elevates the boiler for improved accessibility, airflow, and serviceability while maintaining a clean, organized footprint.

FEATURES & BENEFITS

- **Three Size Configurations**
  Designed to support three Electro-Boiler lines, simplifying product alignment and inventory planning.
  - **EMB-STAND – for EMB-M2/R1 models**
  - **EDB-STAND – for EDB-M2/T1 models**
  - **ECB-STAND – for ECB-T1 models**
- **Purpose-Built for Electro-Boilers**
  Engineered specifically for Electro units to ensure proper fit, balance, and long-term structural support.
- **Heavy-Duty Construction**
  Built for residential and light commercial environments, providing reliable stability and load-bearing performance.
- **Elevated Installation Height**
  Improves access for piping connections, electrical components, and routine maintenance.
- **Clean, Professional Appearance**
  Enhances mechanical room organization and presentation—ideal for contractor-installed systems.
- **Compact Footprint**
  Maximizes floor space efficiency while maintaining robust support for the boiler system.
- **Field-Friendly Design**
  Simplifies installation and alignment in new construction or retrofit applications.
- **Future-Ready Platform**
  Design allows for potential accessory integration such as vibration isolation, seismic anchoring, or leveling adjustments.
