ELECTRO ZONE CONTROLLERS

Boiler Staging Interlock Series

Input dial switch with control logic for direct element staging

MANUFACTURED IN AMERICA
USING THE FINEST MATERIALS & COMPONENTS FROM AROUND THE WORLD

- Designed exclusively for Electro EDB-T1, EZB-T1 and EB-CX Series Boilers.
- Dial a Btu/h for each zone "locks out" boiler stages, eliminating temperature overshoot when only a small zone is calling. Competitors can't match this feature.
- Available in 4 or 8 zones for circulating pumps or zone valves, some models allow for both pumps and valves operating on the same control. Zone expansion available.
- Zone 1 priority high temp, with low temp zone lock out, shifts the boiler output to a higher temperature, eliminating the need for primary-secondary piping and mixing valves which is perfect for an indirect domestic hot water zone.

Electro Zone Controller Board

EDB-T1, EZB-T1 and EB-CX Series Boilers 4-Zone Controller

Model	Description	Max Zones
EB-ZEA-1	4-zone controller, pumps or valves, dual temp with priority	4

Add 4 Additional Zones

Model	Description	Max Zones
EB-ZEA-2	Use with **EB-ZTA-1 or EB-ZEA-1**, extends all features to 8 zones, priority and dual heat still relate to zone 1	+ 4

EDB-T1, EZB-T1 and EB-CX Series Boilers 8-Zone Controller

Model	Description	Max Zones
EB-ZEA8	8-zone controller, zone pumps, dual temp with priority, enclosure and a 40VA transformer	8
EB-ZES8*	8-zone controller, 24V, valves only, dual temp, priority with enclosure, no transformer	8

*A field provided 75VA transformer is recommended when using 8 zone valves.
