APPLICATIONS

Residential | Commercial | Kitchens | Bathrooms | Multi-Family

ELECTRO'S PACKAGED MAKE-UP AIR

Ideal for energy efficient homes, Electro's Packaged Make-Up Air will provide tempered fresh air to help prevent negative pressure and the danger of backdrafting combustion appliances when high CFM kitchen exhaust hoods are used. This completely automatic system is the easiest way to meet compliance with the International Residential Code (IRC) which requires make-up air when 400 CFM or greater exhaust fans are used. The system is also compliant with the Protection Against Depressurization section in Canada's national building code.

APPLICATIONS REQUIRING MAKE-UP AIR

- Residential or commercial kitchens where large exhaust fans are used, up to 2000 CFM
- Homes with multiple bath fans and/or large dryer fans
- Apartment buildings and condos
- Boiler rooms needing heated combustion air
- Wherever ASHRAE 62.3 Code requirements apply
- Public restrooms
- Campground shower houses
- Hair and nail salons

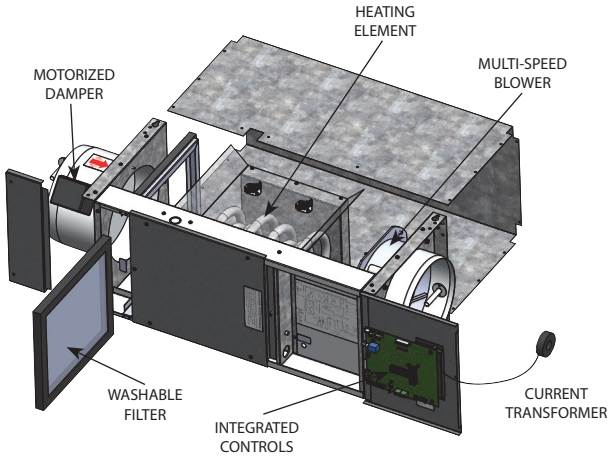

APPLICATIONS REQUIRING FRESH AIR

- Wood burning fireplaces
- Indoor wood burning ovens
- Indoor pool areas
- Cigar rooms
- Greenhouses
- Home gyms

All specifications subject to ELECTRO INDUSTRIES terms and conditions. Download at www.electromn.com.

FEATURES

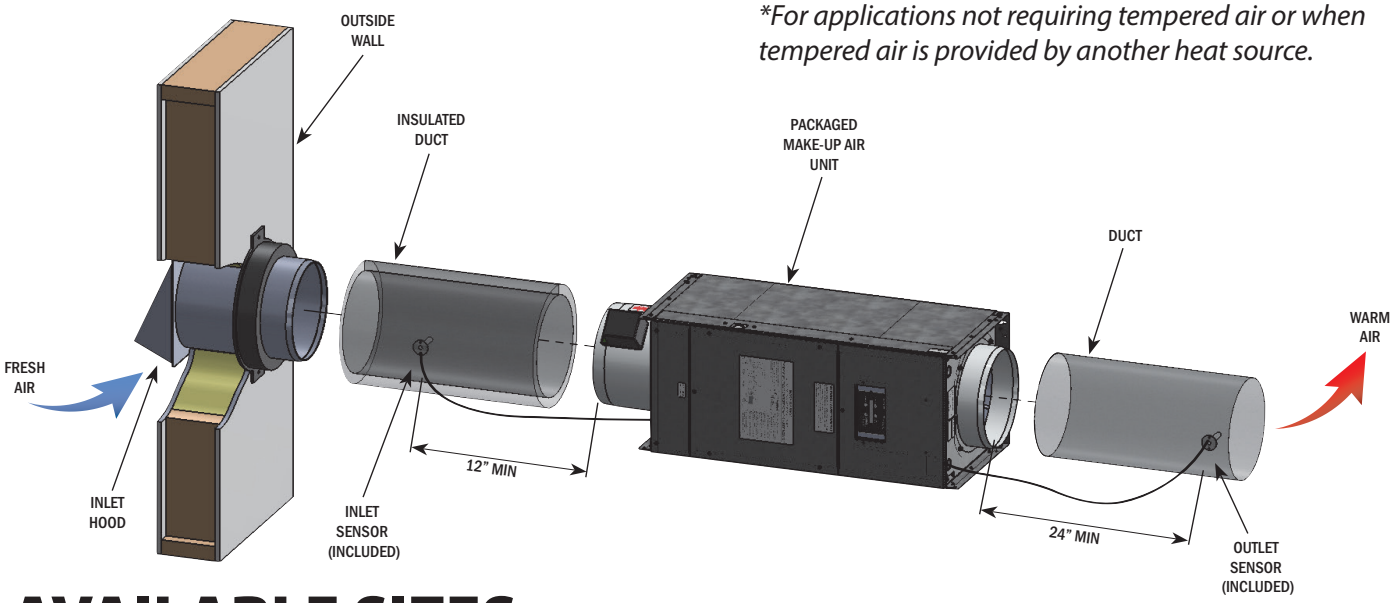

- WarmFlo® Digital Proportional Element Modulation
- Inlet and outlet digital temperature sensors for precise set points
- Integrated powered inlet damper
- Washable aluminum mesh filter
- Current transformer technology for full interlock with exhaust systems
- Multiple control inputs (i.e. end switches, zone valves, etc.)
- Easy programming for multi-speed kitchen exhaust fans
- LCD display provides status and temperatures
- Best in the industry warranty:
  - 20-year finned rod element warranty
  - 2-year parts warranty

NO HEAT MODELS*

- Same features and excellent quality as our standard Make-Up Air models
- No electric heating elements included
- Easy to zone off an existing gas or electric boiler for make-up air heat!

**For applications not requiring tempered air or when tempered air is provided by another heat source.*
